Smart Way To Edit, Fast

**The Master Key
For All NLE Softwares**

06/06

Monarch is the market leader of the Photo Video Industry in India. It is the first Indian company that delivers you software and hardware solutions for photo, video and imaging industry. Monarch has earned its regard for its focus on innovative and reliable products and now brings you its premier offering for Non Linear Editing.

Smart Way To Edit, Fast

The Master Key for all your editing needs

Professional Videography captures and enhances life's most precious and beautiful moments as they actually happen. The tool used to make these moments precious plays a very important role.

Monarch is proud to introduce the first PC based budget solution for Non-Linear Editing, Monarch Smart Edit. With real-time output on TV or a Monitor, Monarch Smart Edit is the only solution that provides compatibility with all major NLE softwares available in the market.

With features that excel in every area and the simplicity through which you can achieve the best results make Monarch Smart Edit every Videographer's dream.

Why Monarch Smart Edit ?

Monarch Smart Edit's friendly user interface and intelligent capture functions lets you easily capture, edit and export videos. Capturing can be done simultaneously from two separate inputs, Analog & Digital, at the same time the editing function can also be performed on any Non Linear Editing software of your choice. Besides being a low cost Non Linear Editing solution, Monarch Smart Edit sports some outstanding features that help you deliver the best to your customers in no time!

Monarch Smart Edit, the Smart Choice

One for All

Monarch Smart Edit is bundled with Ulead software but if you or your computer operator is familiar with some other NLE software, you can still use it with Monarch Smart Edit. Monarch Smart Edit supports all major NLE softwares in the market. With Monarch Smart Edit you can edit in real-time and preview it on TV or Monitor.

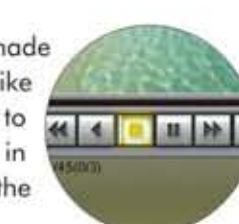

Smart Project Mode

With Monarch Smart Edit you can create instant portrait songs, highlights and titles. All you need is to capture Boy, Girl and Couple in project mode, your complete portrait songs or highlights will be ready instantly. Moreover, Monarch Smart Edit comes bundled with its own titling software – TitleMix Pro. You just need to create number of pages and select the language, TitleMix Pro will generate exclusive titles for your video. Moreover these titles can be saved and re-used later.

Pause while Capture

For the first time this feature is made available in a Non-Linear Editor. Unlike other video editors, in which you have to stop the video and create a new file, in Monarch Smart Edit you can pause the video while capturing.

Galore of Effects

Monarch Smart Edit is bundled with more than 1000 ready-to-use effects that are organized category-wise for easy reference. To apply effects, you just need to drag-n-drop the effect on the time-line. Specially designed for event videography, Monarch Smart Edit features some exclusive wedding related effects and backgrounds. Also you can add your own background.

New Dual Deck Mode

The Dual Deck Mode in Monarch Smart Edit enables you to capture videos from 2 inputs simultaneously. Monarch Smart Edit can capture from Analog input or from Digital (IEEE 1394) @. Monarch Smart Edit can capture AVI, MPEG1 or MPEG2 with on-screen summary display.

Scene Detection

Monarch Smart Edit can capture with real-time scene detection from your DV-cam. Scene detection will

automatically log scenes with timestamps for your reference. This helps you to apply effects more efficiently and gives your video a better look.

Edit while Capture

With Monarch Smart Edit you can edit your videos while capturing. Moreover Monarch Smart Edit displays the capture summary on screen. Hence you can edit simultaneously with capturing and save your precious time.

Record Directly to VCD/DVD

Monarch Smart Edit offers real-time on-the-fly creation of DVDs from DV/VHS, a feature useful when you just need to create plain vanilla DVDs. This means that you need not capture the video, just connect your Analog or DV input to Monarch Smart Edit and press the record button.

Switch Drives

Running out of space from a partition of your Hard Drive? Don't worry. Monarch Smart Edit gives you the option to set alternate capture drive. Hence no running out of space.

Free HDD Space: 21730 MB (20490 + 1240)

AVI Capture Path D:\capture
Alternate Capture Path C:\capture
