MONARCH

FIREDECK™

Capture Card for MPEG Recording

A digital recorder for Fire X. Fire deck is an add-on product for Fire Deck for making DVD in the same machine simultaneously while mixing. You can install the Fire Deck in your Fire deck machine. Fire deck is a hardware based DVD authoring solution. After installing Fire deck you can do non linear editing as well as DVD authoring. Fire deck is a digital recorder that records your video directly on your hard disk drive.

You can rewind just like a normal VCR and remove the unwanted jerks by the last frame setting and continue with your recording. Because of this feature of VCR you don't have to buy a separate video recorder as it records in digital format. You will always get better quality output without generation loss. You will also get 100% audio – video synchronization as it has built-in TBC. Now it is possible to do a 3 hour mixing / dubbing and DVD authoring simultaneously in 3 hours.

Minimum System Requirements

- Intel Pentium® IV Dual Core processor
- 512 MB RAM (1GB recommended)
- 80 GB Hard Disk (7200 RPM recommended)
- DVD Writer
- Windows® XP / SP-2
- DirectX 9.0 or above
- Minimum 1 free PCI slots
